

**ODI Software Review
Panel Charge**

1. Are the software system requirements complete and adequate?
2. Will the proposed software, network, and hardware architecture meet the science and operational requirements?
3. Are the interfaces to other hardware and software systems defined completely and adequately?
4. Is the design maintainable, and expandable?
5. Have we identified and addressed potential safety issues?
6. Can the software be done within the allocated budget and time?
 - a) Have we identified ways to mitigate the risk associated with the proposed budget and time?
 - b) Is the staffing plan sufficient?
